Due to the issues we had with our timer [Eco Chrono/GranFondo Eco], we were unable to provide and post proper results [in a timely manner] as we intended to do using their chip time data.

In order to provide results as best possible, over the past 2-weeks we have asked riders to post their GPS ride data to **Ride with GPS** to help us create a Leader Board for each of the 5 ride events.

We greatly appreciate the efforts of those who had GPS data and we appreciate the feedback from many riders who helped with details. We also appreciate your patience as we worked through the challenges.

We have reviewed the rider data, spoke with RA's and many riders within the 5 ride events to help us best obtain results, where questions arose. Our intent was always to use only the cumulative times from the Time Trial Segments [specific to each of the 5 ride events] to determine the Top 3 QOM/KOM Champions however we absolutely had anticipated having more detailed/complete rider data + proper start/finish times.

Again, we cannot express enough how deeply we regret the letdown.

We feel the event has evolved over the past 5-years and this needless timing drama is painful.

Over the next 12-months, we will do what is required to ensure this doesn't happen again.

Thank-you for your patience and understanding.
